

NOVEMBER 7, 2023

9:00 a.m. to 11:00 a.m.

AGC Training Center - 1649 W Shoreline Drive, Boise, ID 83702

Type 1 L - Strategies and Materials for Sustainable Concrete Mixes

Presented By: Tony Thompson Senior Technical Services Specialist, GCP/Chryso

What is it?

Why is it?

How to work with it?

This presentation will address material use and strategies to produce more sustainable, lower GWP concrete.

- Improving performance of mixes containing currently available cements
- Strategies to deal with varying types and sources of SCMs
- Methods to use lesser performing local aggregates
- New carbon optimizing technologies
- The effect of testing variability on sustainability

REGISTRATION: Please fill out below and e-mail to icapaidaho@gmail.com
Or send e-mail directly to icapaidaho@gmail.com with number of people attending the seminar and ICAPA company members that will stay for the meeting.
